## My Music Video Ideas:

The Artist and song - Sweet Disposition - The Temper Trap

New name for the band - Without Trap

Name of album - Ripped Apart

Genre of the music video - Hate/Worthless

The set of the music video - House and in a car and then it ends in a place??

Who is going to be in the music video - Girl - Me and Maybe a group??

**Ideas** - Girl packs her bags in her room to leave home but secretly she does not want to go as she has a boyfriend who she does not want to say good bye to. Camera shows pictures around the room of her life and how her life resolves round her boyfriend. Phone rings but she ignores his call. She walks out of her house and leaves, she then gets into the car and then the camera shows the car driving away then she looks back. Then they get on the motorway and then the camera is going to speed up time to make everything go fast. Through the chorus it will show pictures of them. Then it turns dark and shows all the lights outside and also reflects on to the girls face. Then the music stops when the car stops. She then get out and man gets her bag and he leaves her there and he drives away. Then the music plays the last bit of the song while she walks up to the place where she has to go.
